

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country journey in their RV. Freshly retired, after spending many years working with his brother to build their crane company into an market leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

While on their journey, John spent time conversing with former business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered an infinite market for a product that could promptly and safely lift individuals in the air to accomplish upkeep and other building services.

After returning from their holiday, John set up a joint venture with two of his friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty personnel, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design elements of that original lift into existing designs.

JLG lift trucks have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. At present, the company proudly continues to expand itself into many markets globally and develops new products to ensure consumers are capable of being more efficient and perform in the workplace within a safer atmosphere.
