

Electrical Parts for Forklifts

Forklift Electrical Parts - Forklifts together with various forklifts could have particular labels utilized in certain hazardous locations. The label denotes that this specific model of lift truck meets the minimum standards of ANSI/UL 553 utilized for electric lift trucks or ANSI/UL 558 for internal combustion engine lift trucks.

Applications for marked lift trucks may be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Areas of Use, Maintenance and Operation, and Type Designations. Check with your local insurance provider and Fire Marshall for more information regarding the approved uses of industrial powered forklifts in your application.

If the certain forklift satisfies the outlined standards, labels can be put. A labeled lift truck would show the type of designation put on the nameplate and would have a correctly corresponding label put.
